

Original Quinton Hypertonic Marine Plasma, 30 Count, from Spain

Item Catalog Number: 17442
30 Vials

Quinton Hypertonic Marine Plasma represents the original blueprint of life. It has three times the mineral concentration of your blood and is ideal for energizing, mental focus, sports performance, challenged immune systems, and rapid re-mineralization.

Benefits of using Original Quinton

- Energy
- Endurance
- Focus
- Recovery
- Flexibility
- Relaxation / Sleep
- Detoxification
- Digestive Support
- Immune Support
- Adrenal Support

Original Quinton Hypertonic Marine Plasma

Hypertonic is pure marine plasma that is three times the mineral concentration of your blood and is the most potent. Hypertonic is ideal for energizing, rapid re-mineralization, and building the physiology. Health professionals report application for dramatic energy increases, mental focus, sports performance and challenged immune systems.

Hypertonic is a good way to start your protocol if you are generally healthily or looking for athletic performance. Many Hypertonic users report positive results switching to Isotonic after several months and back to Hypertonic occasionally to regulate their system. After trying both, many just "know" which one they need when.

Quinton marine plasma is the living fluid produced by, and harvested from, an oceanic plankton bloom.

Discovered by French physiologist René Quinton in 1897, this nutrient-rich seawater (cold sterilized and processed according to pharmaceutical grades) has been used for over 110 years to restore the bio-terrain.

- Quinton marine plasma has been applied by thousands of doctors in clinical and emergency settings for over 100 years throughout Europe, Asia, and South America.
- At one time, the Quinton family funded 69 free clinics throughout Europe to dispense Quinton to those in need.
- Quinton was secretly used by the French Army as a blood plasma replacement.
- Quinton was recognized as a pharmaceutical for over 80 years.
- Quinton was featured in the Dictionnaire Vidal (France's equivalent of the Physicians' Desk Reference) from 1953 to 1999.
- One publication summarized a 2,000 person, 20-year follow-up study that evaluated Quinton for both safety and efficacy for a variety of acute and chronic health conditions.

Isotonic

Quinton Isotonic is pure marine plasma diluted to match the concentration of your blood and is the most gentle.

Isotonic is ideal for a sensitive system, gentle detoxification, and restoration. Health Professionals report application for deeper sleep, emotional and physical balance, recovery from sports and exertion, and relaxation. Isotonic is a good way to start your protocol if your constitution is weaker. It is also ideal for long term use.

Hypertonic

Hypertonic is pure marine plasma that is three times the mineral concentration of your blood. Hypertonic is ideal for energizing, rapid re-mineralization, and building the physiology. Health professionals report application for dramatic energy increases, mental focus, sports performance and challenged immune systems.

Hypertonic is a good way to start your protocol if you are generally healthy or looking for athletic performance. Many Hypertonic users report positive results switching to Isotonic after several months and back to Hypertonic occasionally to regulate their system. After trying both, many just "know" which one they need when.

New QuintEssential Bioterrain Restore and Optimum Mineralization

The same as the Isotonic and Hypertonic solutions with an easier to open seal. The Original Quinton involves breaking the glass vial. QuintEssentials have an easy to open silver seal.

Supplement Facts

Serving Size: 1 Drinkable Vial (10 ml)	
Servings Per Container: 30	
Amount Per Serving	
Sodium	102 mg
Magnesium	11 mg
Other Ingredients: Seawater	

Dosage and Use:

- Drink 1 to 4 vials daily on an empty stomach as recommended by your healthcare professional.

Usage Protocols:

General Guidelines

1. Take the marine plasmas on an empty stomach; 15 minutes before meals.
2. For the first month: One to two isotonic vials per day.
3. For the next month: One to two isotonic vials per day along with one hypertonic vial (separate the intake of the isotonic and hypertonic)
4. For the next month: One to two hypertonic vials per day (do this up to 3 months)
5. After 3 to 9 months: One to 6 vials per week (may want to alternate which form you take, depending upon physiological needs).

General Recommended Protocols

Mode of Action	<i>Re-establishes bio-terrain by replenishing extra-cellular fluid with full spectrum bio-active minerals, salts, and amino acids. Facilitates homeostasis through principles of intra- and extra- cellular osmosis. Facilitates balanced re-hydration (i.e. it is an electrolytic balancer)</i>
Initial Dosage	<i>1 10 ml vial of Quinton™ Isotonic per day on an empty stomach for the first 7 days. Increase to 2 vials of Quinton Isotonic per day on an empty stomach for the next 3 weeks.</i>
Dosage After 1st Month	<i>In the second month, introduce 1 vial of Quinton™ Hypertonic in the morning on an empty stomach and continue on 2 vials of Quinton Isotonic in the afternoon on an empty stomach. As much as 4 vials of Quinton Hypertonic and 4 vials of Quinton Isotonic can be taken daily under health professional supervision and under specific circumstances.</i>
Maintenance Dosage	<i>After taking Quinton plasma for three consecutive months, it is recommended that people take 1 to 2 vials per week of either Hypertonic or Isotonic.</i>
Secondary Effects	<i>It is important to work with clients to ensure that their bowels are moving regularly. If not, in rare circumstances, the client may develop temporary signs of detoxification such as skin blemishes and constipation. No adverse effects have been reported.</i>

Warnings:

- If pregnant or lactating, consult your physician before taking this product
- Keep out of reach of children
- Do not exceed recommended dose
